LATHAM—the BIG Red Raspberry

Special catalog

LIBRARY

RECEIVED

★ MAR 23 1928 ★

U. S. Department of Agriculture

LATHAM IS 100% RASPBERRY

SENSATIONAL in YIELD and PROFIT

5430 qts. per acre—\$1629.00 per acre

The superior yielding ability of Latham is fairly represented by the following comparative figures. Reprinted from the Connecticut Agricultural College Review, September, 1925. W. H. Darrow, Fruit Specialist.

Report on 3-year old Field: Latham, 5430 qts. per acre. Herbert, 3648 qts. per acre, Cuthbert, 3600 qts. per acre. **5430 qts. per acre at 30c per qt., make the neat return of \$1629.00 PER ACRE.**

Latham is so good that we will pay \$1000. cash for the exclusive selling rights of any new raspberry that is superior to Latham in hardiness, bearing qualities, size and color.

FROM THE "GARDENER'S CHRONICLE"

Harold M. Bryant, in *Gardener's Chronicle*

"The Latham is without doubt the best red raspberry for the grower to plant today. It has proven entirely hardy in the Dakotas and the Northwest. It is a splendid cropper, bearing fruit the largest and firmest I have seen of any variety and holding the size throughout a long picking season. It is a pleasure to pick berries of such size and of delectable appearance."

EASY TO GROW: Latham Raspberries can be easily grown in the home fruit garden and they require little care.

A Source of Pleasure and Economy for Home Owners

Why pay 20c a pint for Raspberries at the stores when fresher berries can be so easily raised in your garden? Enjoy the pleasure and profit of growing your own.

Latham doesn't require expert attention. Our Mosaic-free plants are healthy and vigorous and produce abundantly.

They commence to bear soon, and continue for many years. Latham will produce the most berries for the least work of any thing you can plant.

Strong, healthy plants for Spring planting. Price, \$2.50 per 12; \$15.00 per 100; \$100.00 per 1000.

Plant vines like this one this Spring

**Nothing Quite So Sure to Grow, Nothing Quite So Sure to Bear,
Nothing Quite So Sure to Please Every Taste**

Extra Heavy 3-Year Old Vines

Planted This Spring, Should Produce Fruit Next Autumn

CONCORD—(black) Large and handsome, very hardy, productive and reliable; succeeds well over a great extent of country, and is one of the most popular market grapes.

IVES—(black) Bunch extremely large, shouldered, compact, handsome; Berry—large, tender, juicy, sprightly vinous, rich, sweet without pulp. Vine is vigorous, healthy, hardy.

LUCILE—(red) Bunches very large and compact; berries large, rich dark red; pulp sweet and delicious; vine extremely hardy, healthy, and bears tremendous crops.

DELAWARE—(red) One of the finest of our native grapes. Ripens early. Bunches small and compact; berries small, light red, with a violet bloom, beautiful; sweet, sugary and vinous, with a musky aroma.

CATAWBA—(red) Bunches large and loose; berries large, of coppery red color, becoming purplish when well ripened; vinous, rich.

CAMPBELL'S EARLY—(black) Clusters large and handsome; berries large, nearly round, black with light purple bloom; flesh rather firm, but tender; quality rich, sweet, slightly vinous; a strong and vigorous grower.

BRIGHTON—(red) Flesh rich, sweet, and of the best quality, equal if not superior to Delaware; ripens early. Productive and vigorous.

NIAGARA—(white) Bunch medium to large, compact, occasionally shouldered; berry large, roundish, uniform; skin thin but tough, pale green, changing to pale yellow, with a thin whitish bloom; flesh slightly pulpy, tender, sweet; ripens with the Concord.

**Prices for These Superior Super-size Super-age Plants \$1.00 each;
\$10.00 per 12; \$75.00 per 100**

GLEN BROTHERS, INC., Rochester, N. Y.

Lexington, Ky., February 23, 1927.

Dear Sirs:—Two or three years ago, while living in the Kentucky mountains, at Coxton, I bought from you a Niagara grape that bore the year it was set out. I am now living at Lexington, Ky., and have a little room in my yard for a few vines. I want one each of a Niagara, Delaware and Champagne grape that will bear this year. Have you them? If so, please let me know the price. Truly yours, F. A. ATKINS, 463 Oldham Ave.

BIG BUSTER SIZE ROOTS OF
Pedigreed Mary Washington Asparagus
 from Glenwood Fields

The Best High Producing, Tender, Green Asparagus for Market
 And Home Use

100 of these whopping big 3 year old plants \$7.00; 500 plants for \$30.00; 1000 plants for \$55.00.

Three years ago we planted the *Pedigreed* seed, on some of the richest land in our nursery—for three years we have cared and cultivated and even cut large tender stalks of delicious asparagus for our own tables—These are the plants we offer you.

FOR A QUICK CUTTING BED—Plant these Big Buster, fully 3-year old, extra selected roots.

ORDER NOW under this guarantee: If upon receipt of shipment you find that the plants are not the finest and largest 3 year asparagus roots you have ever seen, wrap them up and return to us, and we will refund your money without question, quibble or controversy.

Growing your own asparagus is as simple as $2 + 2$.

For success, the soil in which Asparagus roots are planted should be well drained, and while it does not need to be necessarily rich, always remember the richer the better. Set the roots in trenches, six to ten inches deep, and cover with only a few inches of soil; as the plant grows the soil can be levelled in. A heavy mulch of coarse manure should be given in the late fall. Be sure and cut the tips off before the seeds begin to ripen.

There is no variety of asparagus as good as the Washington and no strain of the Washington near as good as the "Mary."

BLUEBERRIES

Nursery Grown Plants

CAN you imagine anything more satisfactory than having delicious blueberries growing in your own garden? No doubt you have enjoyed these wonderful fruits on the hotel or restaurant menu, served with cream for breakfast, or as blueberry pie or dumplings for luncheon or dinner. They are a fruit that satisfies for three meals a day and one dozen plants are quite sufficient to supply the average family with blueberries. They can be used freely for making breakfast muffins or preserves.

One pint of fruit sufficient for one big juicy pie.

PRICE

\$1.50 each \$15.00 per dozen
\$100.00 per 100

CULTURAL DIRECTIONS: Blueberries require an acid soil to produce the best results. This is prevalent in many sections of the country. Where your soil is not acid, we suggest the following method to get the most from your plants. Choose a well-drained location, easily supplied by water during the dry summer months. Blueberries do best with full sun, although they will grow and produce fruit in partial shade. In order to get the proper acid condition to your soil, mix partly rotted leaves with the soil of your garden. A heavy mulch each fall of partly rotted leaves will maintain the acidity of the soil. Do not remove this mulch, but let it remain throughout the year.

Never use manure or compost near a blueberry plant. No pruning is necessary except as a branch may become damaged or stop bearing. Water your plants well the first year, soaking the ground two or three feet away from the roots.

HARDY AND ORNAMENTAL

Nor should the ornamental value of Blueberries be overlooked. Prof. Bailey says: "In the Spring the young shoots and leaves are a rich bronzy red, later the clusters of long white flowers, followed by clusters of dainty pink buds. In winter the red bark creates a charming tracing of red twigs against the snow. Rarely does a plant or shrub combine such exquisite beauty with a fruit, than which there is none more delicious. It is one of the most valuable species both for fruit and as an ornamental shrub. It thrives in the garden and is readily susceptible to improvement by cultivation."

Try a Dozen this Spring.
Fruiting Season Early July 'till Late Summer.

All plants dug and shipped with roots in ball of acid soil, burlapped.

Nursery grown Blueberry plant balled and burlapped ready to pack for safe shipment to any part of U. S.

Plant FILBERTS for Pleasure or Profit

Less than 3 acres of land here at Rochester planted to these improved European varieties 3 years ago produced

1600 lbs. of Nuts last Fall

Kentish Cob

Minna's Zeller

White Lambert

Medium Long

Italian Red

These illustrations are actual size of nuts and are reproduced from photographs of the different varieties harvested from these trees last fall.

Trees grown at our Nurseries are withstanding temperatures of 15 degrees below zero without winter-killing, which should be sufficient warranty of their hardiness throughout the eastern and northeastern sections to call for extensive plantings. Moderately rich, well-drained soil is required, and pruning is essential if grown in tree form, although abundant crops of nuts are borne if permitted to grow naturally—in the form of a many-stemmed bush (See top illustration). The nuts should not be gathered until ripe, which condition is indicated by a browning of the husk.

Plant this Spring—Harvest Nuts in two years

VARIETIES

ITALIAN RED—One of the finest of the improved filberts. Nut large, of fine brown color, oblong, shell remarkably thin and kernel of excellent flavor. A fine upright grower and a prolific bearer.

KENTISH COB—Tree upright and conical in growth. Thrifty and prolific. Nut large, very long, somewhat light in color. One of our best varieties.

MEDIUM LONG—Tree upright and vigorous, somewhat bushy. Fruit long, narrow, medium to large, beautifully striped. We consider this a very fine nut.

WHITE LAMBERT—Tree of low and drooping growth. Nut short and broad; a large, fine variety.

MINNA'S ZELLER—Tree low, drooping. Nut large, almost round, quite early. A very valuable variety and an excellent pollenizer.

PRICES

Strong, well rooted plants, size 2 to 3 feet, \$1.50 each, \$15.00 per doz., \$100.00 per 100

It's a PEACH of a PEACH!

ROCHESTER—the big yellow free stone

At Rochester, N. Y. it ripens in August.

The earliest yellow free stone of all.

Just the exact qualities in a peach that everyone has been wanting.—It's here. A 100% perfect peach for the home garden as well as for the commercial planter.

HARDY—Has stood 16° below zero without injury.

The tree is a strong, upright grower, extremely hardy. Has stood sixteen degrees below zero and produced a full crop of fruit while Elberta and Crawford under the same conditions, in the same orchard, produced no blossoms and consequently no fruit.

403 perfect peaches from a 4-year old tree

You are out of luck if you don't plant a few Rochester

Bears first year planted.

Our customer, Mr. C. N. Thomas, 215 West 40th St., Savannah, Ga., writes: "In February I bought a Rochester peach tree and on July 20 SAME YEAR I picked one of the finest peaches I ever tasted."

Our customer, C. A. Harris, 2325 Broadway, Fort Wayne, Ind., sends photograph of a Rochester peach tree which produced twenty-four peaches year following planting.

Our customer, Mr. C. E. Strawbridge, Lima, Ohio, picked exactly 403 large Peaches from one tree four years after planting.

It's a winner with our customers — It's all peach.

Mrs. E. A. Jones, Treasurer, Playground and Vacation School Association, Emsworth, Pa., writes: "I want to say that the last Rochester peach tree I got from you is so full of peaches that some of the limbs have broken with their weight, although propped up, and in the future I shall be careful to place my orders with you. I haven't a very large place. Wish I had. I would fill it with Rochester peach trees, for they are certainly the finest I ever saw."

"ENCYCLOPEDIA OF HARDY FRUITS," by Prof. Hedrick, describes Rochester Peach as follows: Color, orange-yellow blushed with deep dark red; flesh yellow, stained with red near the pit, very juicy, tender and melting; sweet, highly flavored.

PRICE FOR SPRING PLANTING—ORDER NOW

Regular size, 3-4 feet	\$1.00 each, \$10.00 per 12, \$ 75.00 per 100
Large size, 4-5 feet	1.50 each, 15.00 per 12, 100.00 per 100
Extra large size, 5-6 feet	2.00 each, 20.00 per 12, 150.00 per 100

50 trees at the hundred rate

Exact size of Green Globe Artichoke

Large Green Globe Artichokes

Artichokes are a delicious delicacy found on the menus and served at leading hotels, restaurants, dining cars, etc. They are easily grown in back yards, along fences, and in the vegetable garden, requiring very little care and attention after planting. The Green Globe Artichoke grows to a height of three to five feet with numerous branches and the roots should be set about 5 feet apart. The portion eaten is the underside of the head, before the flower opens. The whole head is removed and boiled, the leaves laid aside and the bottom eaten dipped in butter with a little pepper and salt.

The crowns should be covered with coal ashes in winter to shed water, and over these a covering of leaves, held in place by earth or litter. When spring arrives remove leaves, but do not disturb ashes until signs of growth appear, after which the ashes should be spread out over the ground.

Ours are not small tender green house grown, pot plants *but strong roots* ready to "take hold" and give a good account of themselves this summer.

PRICE: \$3.00 per 6; \$5.00 per 12; \$35.00 per 100.

Our Little Model Orchard of Dwarf Fruit Trees

FRUIT THROUGHOUT THE YEAR

An All Season Collection of Apple and Pear Trees

APPLES

Season for table use

1 Red Astrachan	August

12 TREES IN ALL

All Trees Well Rooted and Branched and Many of Them Should Produce Fruit Next Year. All Should Produce the 3rd Year.

There are pleasant surprises in store for the customer who sets out this little orchard of twelve dwarf fruit trees. Dwarf trees have the advantage of growing low, fruiting early and may be planted as close as eight feet apart each way and bear almost unbelievable loads of the largest and handsomest fruit.

Fruit produced by dwarf trees is same size and quality as produced by standard trees.

\$10.00 is the Price of this Assortment—Order Today.

The Greatest Investment You can Make!

Burbank's Giant Crimson Rhubarb

INTRODUCED BY THE LATE LUTHER BURBANK

It is not Unusual for a Single Stalk of this Wonderful "Pie Plant" to Weigh a Pound.

For many years extensive experiments were carried on by Mr. Burbank for the improvement of the rhubarb. From crossing of the Giant Perpetual with the best European and American varieties some remarkable giant, early and fine flavored varieties were produced—one of them was **Burbank Giant Crimson**.

PLANT THIS SPRING—Ready to Use in Thirty Days.

Extra large, of fine bloom, and crimson color, this new variety of appetizing "pie-plant" should be in every garden and will be when known. Plant a few this Spring along side that you now have growing in your garden and note the difference. Burbank's Giant Crimson is superior in size and quality to any variety we have ever tasted. It is an early variety without being in the least tough or stringy, with a mild sub-acid flavor. Largest and best of all for market or home use. *Plant this Spring in good garden soil, manure well, and have delicious pie and sauce all summer.*

PRICE: Mammoth roots, 2 to 3 years old, 25c each; \$1.25 per 6; \$2.00 per 12.

Extra Special—New Grape "CHAMPAGNE"

BRING California to your door. A grape as good and some say better than the famous "Muscatel" grape of California. Large, luscious fruit of a flavor all its own. The more you eat, the more you want. The plants are laden down with beautiful coppery red clusters, ripening the later part of August. The berries are the size of a five-cent piece. Twenty to forty feet of vine being common in one season.

HARDY AS IRON

Champagne never having been known to winterkill, always producing an immense crop of fruit even during season when many other varieties fail to fruit.

The flesh is tender, extremely juicy and sweet with a rich aromatic flavor. Its keeping qualities are superior. Fine for eating fresh and wonderful for pressing juice. Order now for Spring planting.

**PRICES—2-Year-old plants, extra strong \$1.00 each;
\$10.00 per 12; \$65.00 per 100.**

The Adams Improved Elderberry

Larger berry cluster—Larger berries

The Adams is a decided improvement on the common Elderberry—Endorsed by the New York State Fruit Testing Co-operative Association, Inc.

Plant for Fruit or Ornamental Purposes.

Adams is a distinct variety and should be planted in place of the Common Elderberry.

Imagine the joy of picking large bunches of ripe, delicious Elderberries from trees growing in your own garden.

Heretofore the only way one could get Elderberries was to go out in the country and gather them from the trees growing wild in the fence corners and along hedge-rows, but we have solved the problem for you in our Adams Improved Elderberry bushes.

Plant a few in your garden this spring. The fruit makes delicious pies and jam. Elderberry wine has been a common home product. Color of fruit is black or blackish. Height of tree is only ten to twenty feet when fully grown and the trees may be planted close together. Requires no care or attention and commence bearing abundantly almost immediately.

We offer for Spring Planting a limited number of extra fine nursery grown trees, at \$1.50, each, \$15.00 per dozen. Order at once as our stock will soon be exhausted.

Hardy English Walnut Trees

FOR SPRING PLANTING

English Walnut. Every English Walnut tree we sell was started from seed produced from a bearing tree growing in this locality—every tree is guaranteed to be a "Glenwood Grown" tree, hence our trees are very hardy. Such trees are the only safe trees to plant in Northern latitudes. Neither our young nursery trees nor our six or seven year old bearing trees have ever shown the slightest evidence of injury from winter temperatures of eighteen to twenty degrees below zero.

Plant a few of these trees this spring. In your available space a few hardy, vigorous English Walnut trees will prove valuable for decoration, shade, and allow a household supply. The smooth bark is light gray in color, and the leaves are long, deep green and waxy. The English Walnut is a rapid grower.

Size	SIZES AND PRICES	Each	Per 10

AVERY, KRETZMER, OLCOTT, INC.

Scales, Engines, Specialties

30 High Street, Hartford, Conn.

March 11th, 1925.

Glen Brothers, Rochester, N. Y.

Gentlemen:—Will you please send me a copy of your latest catalogue?

It might interest you to know that some nine years ago I purchased several English Walnut trees from you, these trees have made a most satisfactory growth, and have borne a few nuts for the last three or four years. Last year four of them bore fruit of very good size and quality. One tree in particular bore some five or six quarts of very good nuts.

Have been quite pleased with the results from these trees.

Very truly yours, (Signed) IRVING J. AVERY

Wolcott Hill, Wethersfield, Conn.

4 Year Old Seedling English Walnut Tree at
Glenwood Nursery That Has Produced Nuts

SPECIAL PRICES on "BIG BUSTER" SIZE FRUIT TREES

Trees Four Years Old ~ Seven to Nine Feet Tall ~ Beautifully Rooted ~ Handsomely Branched

\$2.00 each; \$18.50 per 10; \$150.00 per 100

For those of our customers who desire trees of larger size than are usually sold by nursery men, and desire quick results, we have grown a few thousand of these handsome specimens. It takes work, time and money to produce them and we have spared neither. Inquiries for these older and larger trees are becoming more numerous each year. These inquiries make it evident that many people prefer older and larger trees for quicker results. Hence, to supply this increasing demand, we are now growing a much larger stock of **BIG BUSTER SIZE FRUIT TREES** than formerly.

VARIETIES OF BIG BUSTER SIZE FRUIT TREES

Luscious Apples for "Apple Jell"

RED ASTRACHAN: Large; deep crimson; juicy. August.
YELLOW TRANSPARENT: Medium size; pale yellow; good. July and August.
FAMEUSE (SNOW): Medium size; bright red; flesh white. Juicy. October.
GRAVENSTEIN: Large; yellow overlaid with red; juicy, productive. September to November.
TWENTY-OUNCE (Cayuga Red Streak): Very large; yellow splashed with red. October.
BALDWIN: Large; deep red; crisp and juicy; vigorous grower; heavy bearer. November to March.
DELICIOUS: Ranks high as a variety for commercial or home orchards. Large; brilliant dark red; flesh fine-grained, crisp, juicy. November to February.
MCINTOSH: Large; deep red; flesh crisp; tender, juicy. October to December.
NORTHERN SPY: Large; bright red; spread with delicate bloom; flesh tender, rich, delicious. November to March.
RHODE ISLAND GREENING: Large, greenish yellow; flesh tender. December to April.
WEALTHY: Medium to large; deep red, juicy. October to January.

Sweet Cherries for "Cherry Pies"

DIKEMAN: Large; black.
GOVERNOR WOOD: Large, light yellow, shaded and mottled with light red.
LAMBERT: Very large; dark purplish red, turning to almost jet-black when full ripe.

NAPOLEON: Very large; pale yellow, spotted and shaded with deep red.
BLACK TARTARIAN: Very large; black; tender.
LARGE MONTMORENCY (Sour).

Juicy Plums for "Plum Conserve"

BRADSHAW: Very large; dark violet-red.
GERMAN PRUNE: Large, oval; dark purple.
YELLOW GAGE (Prince's Yellow Gage): Large, oval; golden yellow, slightly clouded; flesh deep yellow, rich, sugary, melting.
LOMBARD: Medium size; violet-red.
BURBANK: Large, nearly globular; clear cherry-red, sweet, meaty and quite firm.
OCTOBER PURPLE: Large, round; purple.
RED JUNE: Professor Bailey says, "By all odds the best Japanese Plum." Large; brilliant red.

Sugary Pears for "Spiced Pears"

BARTLETT: Large; waxen yellow with red blush; buttery, very juicy and high-flavored.
ANJOU (Beurre d'Anjou): Large, handsome; greenish yellow, with a dull red cheek on the exposed side, flesh fine-grained.
CLAPP'S FAVORITE: Very large; yellowish; green to full yellow, rich.
ANGOULEME: Large; greenish yellow, splashed with russet; a good bearer.
SECKEL: Small, but handsome and delicious; very juicy.
KIEFFER: Large, very handsome; rich yellow, tinged with red, excellent when canned.

MONEY BACK GUARANTEE

Money back if not perfectly satisfied, providing trees are returned properly packed the same day as received. You couldn't ask for anything fairer than this.

Invitation:—Tourists visiting the "Flower City" are cordially invited to visit our nursery any week day eight to four o'clock.—*Seeing is believing.*

Under the date of October 16th, Mr. Rinehart, New York City, wrote a former nurseryman now residing in Rochester, as follows: "Since writing you, I have written to a couple of nurseries in Dansville and one in Geneva, and it looks as though I was not going to be able to get an Apple Tree much in excess of two years. I am disappointed in this as I would like to get it as far along as possible."

Mr. Rinehart received a reply as follows: "You say you want trees older than two years and find them hard to locate. I happened to visit the nurseries of Glen Brothers, Rochester, the other day, where I saw a very handsome block of older fruit trees, including some handsome apples."

Many varieties bear fruit soon after transplanting. Time is money. Plant our super-size 4 year old tree and save time and money.

Just a few of the super-size 4 year old apple, large, beautiful trees; straight trunks, well shaped, branched tops. Note how they tower over the evergreens in the foreground which average about 3 ft. in height.

Sodus, N.Y.,
 April 26, 1927.

Glen Bros., Inc.

We received the last shipment of Rochester peaches and Montmorency cherries and they are certainly fine trees. I am enclosing check of \$350.00 for both shipments of this Spring.

Yours truly,
 GEORGE TUNLEY,
 Sodus, N.Y.,
 Route 1

12 Flowering Shrubs \$5.00

MAKE YOUR GROUNDS AS ATTRACTIVE AS YOUR HOUSE

Flowering Shrubs will make your home more beautiful for many month of the year and for years to come. Whether your grounds be large or small, our "Glenwood Selection" will provide an attractive setting from early spring to late fall.

Plant More Flowering Shrubs

12 Shrubs—all different

One plant each of the following list for \$5.00

"Glenwood" \$5.00 Assortment includes one each of the following:

SPIRAEA BILLARDI—Rather tall; flowers bright pink in July and August. Very showy.

SNOWBALL—(*Arrow-wood*). Upright bushy shrub; foliage changes to purple and red; flowers creamy white in May; berries blue and black.

RED BARKED DOGWOOD—Spreading shrubs 8 to 10 feet tall; purple or dark blood-red branches, greenish white flowers; berries black.

TARTARIAN UPRIGHT HONEYSUCKLE—Bears a profusion of bright pink flowers in the spring; orange scarlet berries.

BUTTERFLY BUSH—Fragrant, rose-purple flowers, with orange eye, in dense, drooping panicles, about the middle of August.

DEUTZIA PRIDE OF ROCHESTER—Large double white flowers which are tinged with pink in the bud.

SWEET SYRINGA—Will add attractiveness and fragrance to the home gardens.

HYDRANGEA PANICULATA GRANDIFLORA—The hardiest and most popular Hydrangea. In July and August massive plumes of white flowers, later changing to pink, bend the branches with their weight.

SYRINGA GRANDIFLORA—Large-flowered Mock Orange. Height, 10 ft. Large, pure white, fragrant flowers.

SPIRAEA AUREA—Golden yellow foliage and double white flowers in June. Effective in shrubbery, for planting along banks or as screens.

SNOWBERRY—Height, 3 to 5 feet. Pinkish flowers, white berries.

TAMARIX—Bright pink flowers in slender racemes in April and May. Very showy with its reddish bark.

A choice assortment of hardy, well established stock, nursery grown, two to three years old, and in size to give immediate effect.

We are now Growing in Large Quantities that Beautiful Shrub

Hydrangea Paniculata Grandiflora

IN STANDARD OR TREE FORM

(See illustration)

Ideal for tubs or lawn planting. Produces largest flower heads of any of the hardy shrubs—these immense cone shaped, pinkish colored flowers are borne in August and September when few other shrubs are in bloom.

Blooms last 'till long after first frost

HYDRANGEA PANICULATA GRANDIFLORA in standard or tree form is very effective planted along the sidewalks or driveways about ten feet apart; it makes the most beautiful sight when in full bloom. It is also desirable planted in pairs on either side of a formal entrance and is very decorative in the formal garden or in the cemetery.

PRICE

Size 3-4 Ft. \$1.50 each, \$15 per doz. Size 4-5 Ft. \$2.00 each, \$20 per doz.
Six trees at the dozen rate.

AN AZALEA COLLECTION

of Six Beautiful, Hardy Varieties—all Different

For outdoor planting. All colors of the rainbow. Deep Pink, Shell Pink, White, Orange, and Canary.

A wonderful collection for lovers of these exquisite shrubs.

The plants we offer are blooming plants, shipped to you with ball of earth burlapped to roots and will transplant easily—Our plants are shipped with bloom buds and will bloom first season.

ARBORESCENS (Sweet Azalea)—Very attractive white, or faintly rose-tinted, fragrant flowers whose beauty is enhanced by the long, bright red filaments of the stamens. The flowers are borne after the foliage appears, and it is one of the most beautiful of all the hardy Azaleas. In sheltered places it often reaches 6 to 8 feet in height. May.

CALENDULACEA (Flame Azalea)—Probably the most gorgeous of the native Azaleas. From early May until well into the month of June, the plants are literally covered with orange-yellow or flame-red blooms which in size are often 2 inches across. The well-known Ghent Azaleas rarely equal in brilliancy this native species. Foliage remains good until late fall and breaks in the spring just before the blooms appear.

CANESCENS (Piedmont Azalea)—Rosy pink or whitish trumpet-shaped flowers of great beauty, borne in May before or with the unfolding leaves, fill the air with sweet fragrance. Plant in masses against a dark background to show the flowers to the best advantage.

NUDIFLORA (Pinxter Bloom)—An extremely beautiful Azalea. Rosy pink or whitish blooms; after or before the foliage develops, of strong, sweet fragrance, and borne in great profusion at about the same time as *A. canescens*. Fall, foliage assumes attractive shades of orange and bronze. Fine for dry open places.

VISCOSA (Swamp Azalea)—The last of the Azaleas to flower, nearly all the other shrubs having passed out of bloom when it bears its heavy load of pure white, fragrant flowers, clothed with sticky hairs.

VASEYI (Pink Shell Azalea)—One of the earliest flowering Azaleas, blooming in April, and its glorious pink flowers open before the foliage appears. It is the most beautiful of all the Azaleas, and in delicacy and purity of color is unsurpassed by the flowers of any other plant.

One prominent nurseryman lists these varieties at \$2.50 to \$3.50 each in this size.

**One each of the above (all different), 6 in all,
size 12 to 18 inches, \$10.00**

LOS ANGELES—Flame-pink, shaded gold.

ROSE MARIE—Clear rose-pink.

SENSATION—Red.

OLD GOLD—Reddish orange.

IRISH FIREFLAME—Orange, splashed with crimson.

MME. EDOUARD HERRIOT—Coral-red, shaded yellow and
scarlet. Winner of the \$50,000 prize offered by the London Daily
Mail.

MRS. CALVIN COOLIDGE—Golden yellow.

RADIANCE—Regarded as best pink rose in cultivation.

MME. BUTTERFLY—Bright pink, apricot and gold.

LIEUTENANT CHAURE—Velvety crimson-red, shaded with
garnet; flowers large.

GRUSS AN TEPLITZ—The clusters of bright crimson flowers are
brilliant all summer, very fragrant, hardy, and vigorous.

SOUVENIR DE CLAUDIUS PERNET—Clear yellow without other
shading and does not fade white. The best tested yellow garden
Rose.

It's one of our big "leaders" for 1928

This beautiful illustration is from a photograph of one of the wonderful collections of Lilacs in Highland Park, Rochester, New York. Much credit is due the late Mr. John Dunbar, Park Horticulturist, for the bringing together of this large and valuable collection of these plants, possibly without an equal anywhere in the world. Every year during the flowering season thousands of people come long distances to view the marvelous display of bloom.

LILACS

SIX SHOWY ONES—ALL FAMOUS HIGHLAND PARK VARIETIES

Lilacs grow almost anywhere—almost anyone can have lilacs—Plant more lilacs, but plant the choice varieties

Our collection is admirable. It consists of more than 30 varieties. We were helped in the selection by Mr. Dunbar. We have selected the following six choice varieties, which we have named "Highland Park Collection." We offer the collection, composed of one each of the varieties described, to a limited number of customers. Order now before stock is exhausted.

All plants are 2-3 feet in size

MICHAEL BUCHNER—Clear lilac, very large clusters, free flowering; makes a very compact bush.

VIVIAND-MOREL—Double. Clear lilac flowers, having white center with violaceous reverse.

ALPHONSE LAVALLE—Double. Very large panicles of beautiful blue flowers, shading lilac.

CHARLES X.—Single. Strong, rapid grower; rather loose trusses of reddish purple flowers.

SOUVENIR de LUDWIG SPAETH—Single. Long panicles of dark purplish red flowers. Splendid sort.

PROF. STOCKHARDT—Very large panicles of delicate rosy pink flowers, the individual flowers unusually large. A very fine lilac.

One Each of the Six Varieties, only \$8.75

Blood Leaf Peach — Brilliant Red Bark Dark Red Foliage

(NOVELTY)

Small trees with blood-red foliage make a charming contrast
planted in shrubberies

Handsome pink blossoms in profusion in early Spring
Plant as an ornamental, also for its fine fruit

OF this remarkable variety "PEACHES OF NEW YORK" by Professor U. P. Hedrick, Vice Director and Horticulturist of the New York State Agricultural Experiment Station says "Blood leaf is a handsome ornamental, its beet-red leaves in early Spring and its pink blossoms borne in great profusion entitle it to esteem for both foliage and flowers. It is worth growing as well as for its fruits." Plant it on the lawn, in your shrub border or in the garden.

Legend

Several stories are told of the origin of this peach. One is that on the battlefield of Fort Donelson, Kentucky, a southern general, fatally wounded, sucked the juice of the peach and threw the stone into the little pool of blood which flowed from his side. From this pit in its bloody seed-bed sprang the tree with its blood-red leaves.

Prices—Strong Trees, 4-5 feet, \$1.50 each, \$15.00 per 12

Greatly Reduced Prices on several thousand extra fine trees of

LOMBARDY POPLAR

The tree one admires so in Italy

Grows from 40 to 80 feet in height. Introduced from Italy soon after the Revolutionary War. Is extensively planted in fine estates, along driveways and for backgrounds. Gives a most artistic effect as it catches the eye from a far distance, on account of standing out prominently against the sky line. Tall, slender and columnar. Its branches are crowded, all growing upward. Fills a place that no other tree can fill.

The selective appreciation of trained landscape builders is getting this fine type into much more general use. Old trees which were thoughtfully placed, are outstanding landmarks today; their great height, dense slenderness, and somber silhouette against the skyline, creating an impressive, picturesque old-world effect.

As a highway border, tall hedge, windbreak, screen or for formal effect it is ideal.

Smash! go prices on **BARBERRY THUNBERGI**

The Hedge of Beauty—Density—Protection

The Hedge Everlasting—The Best of All Hedges

From Christmas to Christmas—Every Day of the Year
—Barberry Is Beautiful

In the early Spring the leaves are a soft shade of green, then as Summer comes they turn to deep glossy green. Later on they assume shades of crimson and brown and bronze-green and keep these colors until these old leaves are pushed off the next Spring. To give still more color the long branches carry a multitude of scarlet berries which will give food to the birds in the cold weather.

Extra Special Price

It's a shame to do it but the plants offered in this special lot are growing on leased land that must be cleared this Spring. Every plant is three years old, healthy, bushy and exceptionally well rooted. In fact this is one of the prettiest fields of Barberry we have ever seen.

To anyone needing Barberry this is a rare buy.

Special prices while they last, order at once.

EVERGREENS *planted about the foundation will*
make it **YOUR HOUSE OF DREAMS!**

A COLLECTION OF
6 Choice Evergreens for \$20
 2 Collections for \$38.00

All Evergreens dug and shipped with ball of earth burlapped to roots to insure safe arrival to destination.

IRISH JUNIPER—A slender, columnar form that is much in favor. The branches are upright-growing, closely appressed, and densely covered with the deep green foliage. 2-3 feet. Sold separately \$3.50 each.

NORWAY SPRUCE—A picturesque tree that is very popular as an ornamental. It is hardy, of rapid growth, and adaptable to a great variety of locations. The foliage is a rich, shining dark green; cones 4 to 7 inches long, light brown. Stands pruning well when used for hedges. 2 3 ft. Sold separately \$3.00 each.

AMERICAN ARBORVITAE—Short, horizontal branches which turn up near the end, giving it a compact, pyramidal form; leaves bright green above, yellowish green beneath, in winter assuming tones of brown or bronze. 2-3 ft. Sold separately \$3.00 each.

GLOBE ARBORVITAE—Symmetrically globular in form and of low, dense growth; foliage a beautiful light green. Another variety that is in great demand for creating formal effects. Specimens planted on the lawn are very effective. 18-24 inches. Sold separately \$3.00 each.

PYRAMIDAL ARBORVITAE—Of much value in formal gardens because of its narrow, pyramidal outline. Branches are short and densely clothed with the dark green leaves, which retain their color throughout the summer. 2-3 ft. Sold separately \$3.75 each.

RETINOSPORA THUNBERGII. (rare)—Has a soft, steel-colored foliage which is very effective. The plant stands pruning, and can be kept to any height. 2 3 ft. Sold separately \$6.00 each.

Glenwood Nursery is the Home of over 50,000 Evergreens—one of the largest stocks in the East.

6 Handsome little specimens each balled and burlapped:
\$20.00; 2 collections, \$38.00.

Perennials are the thing

25 Showy Perennials to Make Your Garden a Riot of Color From June Until Frost for \$5.00

A snappy list of perennial plants that should produce flowers worth many times \$5.00 before snow flies.

Our selection of 25 best perennials for Spring planting. One plant of each variety—25 plants in all. For choice flowers this summer plant this Spring.

GAILLARDIA GRANDIFLORA—A fine large flower, brown center surrounded with crimson rings and yellow border. Blooms all summer. 2-3 ft.
GYPSOPHILA PANICULATA—(*Baby's Breath*). Mist-like sprays of minute white flowers. Fine for bouquets. Blooms continuously. 2 ft.

All of These are Yours for a Five Dollar Bill

Rhododendrons. These enchanting plants produce the most delightful effects in ornamental planting.

Special Offer of Rhododendrons

At positively the lowest prices we have ever sold these delightful shrubs. 1 plant each of Maximum, Catawbiense and Carolinianum. All plants 2-3 feet tall, well branched, well budded, all balled and burlapped.

DESCRIPTIONS

Carolinianum

This is one of our finest introductions and fills a long-felt want for an absolutely hardy dwarf Rhododendron, with clear pink flowers free from any hint of magenta. Stands exposure unusually well and is invaluable as a single specimen or for massing.

Maximum (*Great Laurel*)

A well-known native of our mountain regions, with great clusters of white or rose-pink flowers in June and July, just

after the hybrid varieties have ceased blooming.

Catawbiense

The hardiest Rhododendron. We recommend it as the finest for general use, withstanding exposure and extremes of temperature where other Rhododendrons fail. It is a very free bloomer, with foliage of a dark, rich, lasting green, which never rusts. The trusses of flowers are a bright red-purple.

One Plant Each of These 3 for \$8.50

12 (4 of each kind) \$30.00

Rhododendrons may be planted during April, May and Early June
